

Eric Davis received a B.S. from Chadron State College in 2009, and a Doctorate of Physical Therapy degree from the University of Nebraska Medical Center in 2012. He has been involved in the APTA and NPTA throughout his professional career. Eric worked as a physical therapist at Mary Lanning Healthcare for 10 years with experience in acute care, home health, outpatient, and working in several skilled facilities as well. He was a clinical instructor for several PT programs for 9 of those years, and led a community-based falls program with the South Central Health Department. In 2022 Eric began working full time for 3M as an account manager covering Lincoln and western Nebraska serving home health agencies, wound clinics, and skilled facilities in the greater Nebraska area.

Eric said, “I have a desire to be a candidate for the Nebraska Association for Home Healthcare and Hospice Associate Director due to my regular interaction with all the home health agencies in my territory. I am in a unique position to have regular face-to-face conversations with many of the members of the Nebraska Association for Home Healthcare and Hospice, and with my clinical background I understand the issues that they face. I love what I do for a living, but most of all I love the area that I serve, the nurses and providers, and the patients. I am able to provide brand specific resources to this area with my job, however any chance I have to improve service, education, resources, or improve professional involvement to this area for the improvement of this organization and the population it serves is important to me.”
